

DO NOT ENTER: /B.M./ IN THE SPECIFICATION
05/12/2009

Please amend the specification by inserting the following text between paragraphs [0024] and [0025]:

“FIG. 4 illustrates a cross-section of another example of a pneumatic cylinder having a rotating shaft for moving the scraper of the apparatus shown in FIG. 1.”

Please amend paragraph [0011] of the specification as follows:

“Preferably, the moving means comprises a piston attached to the other end of the shaft, the piston being reciprocally moveable within a cylinder. A variety of pneumatic cylinders are commercially available (for example, single or double acting, without or without spring return, with fixed or rotating shaft), all of which could be used. A cross-section of a double acting pneumatic cylinder is shown in FIG. 3. A cross-section of a pneumatic cylinder with a rotating shaft is shown in FIG. 4. A preferred embodiment uses a double acting pneumatic cylinder with a rotating shaft, magnetic piston, and cushioned end stops.”
